PERSONAL FINANCE

INVESTMENT SKILL

SUPERIOR RETURNS AT LOWER THAN MARKET RISK

Collective Investment Schemes in Securities (Unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go up as well as down and performance is not necessarily a guide to the future. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the company. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. A Fund of Fund unit trust only invests in other unit trusts which levy their own charges, which could result in a higher fee structure for these portfolios. A Feeder Fund portfolio is a portfolio that, apart from assets in liquid form, consists solely of units in a single portfolio of a collective investment scheme. A constant price is maintained for Money Market portfolios. South African funds are regulated by the Financial Services Board and Global Funds by the Irish Financial Services Regulatory Authority. Member of the Association of Collective Investment. The maximum initial fee is 5.13% including VAT and the maximum annual management fee is 1.71% including VAT. The maximum fee for Oasis Crescent International feeder fund and the Oasis International feeder fund is 0.57% including VAT. A prospectus is available from Oasis Crescent Management Company Ltd.
