Investment Objective and Policy

The Oasis Crescent Equity Fund is an asset allocation prudential portfolio that maintains a relatively large holding in equity instruments. The objective is to provide a relatively high rate of capital growth, when compared to other asset allocation funds. The portfolio will also invest in property and bond (sukuk) instruments, which would allow for retirement funds to invest in this particular investment product.

The portfolio is based on a selection of underlying investments that comply with moral and ethical considerations, and satisfies the criteria for Shari'ah compliant investments. It is classified as multi-managed high-equity portfolio that is well diversified by asset class in accordance with prudential investment regulations. This Fund is managed in accordance with Regulation 28 of the Pension Funds Act 24 of 1956.

This document constitutes the minimum disclosure document and quarterly general investor's report

The South African Economy continues to underperform with sluggish growth of 1.1% expected in 2026. The positive effect of the GNU’s, Macro Economic reform are gaining momentum and improving the supply side of the economy, especially the electricity, rail and port sectors. The reforms seem to be lagging in local government and the criminal and justice sectors. The agricultural and mining sectors will support growth in 2026. The impact of the Western Asian conflict, with higher fuel and fertilizer prices, has raised inflation, the cost of living and interest rates, offsetting much of the positive impacts of the Macro Economic reform process.

Growth and South Africa’s position on the global arena will be further undermined due to the anti-foreigner activities around the country, especially in KZN and Gauteng. Africa is a big trading partner of South Africa and SA corporates have big investments and exports to Africa. If these countries retaliate by slowing SA exports, increased regulation on SA corporates, many South Africans will lose their employment, especially in the highly paid corporate jobs. The South African economy has become dependent on these “foreign” workers and many businesses will be affected by the loss of skills, higher wages, fewer tenants while families reliant on support at home will find it difficult to have both parents working full time. It will take time and cost to replace these skills with South Africans. While macroeconomic reforms will positively affect the supply side of the economy and encourage investment and growth, the geopolitical conflicts, local corruption, failing municipal infrastructure and the continued assault on foreigners will undermine the skills base, the supply side of the economy, investment and economic growth. The South African economy is expected to underperform in the foreseeable future.

The key risks to the South African economy include, 1) geopolitical tension, 2) energy and food supply-chain disruptions, 3) higher inflation and interest rates, 4) the south African political environment becoming more unstable and the continued decline in local government, 5) high levels of corruption, 6) the anti-foreigner movement, 7) the end of macroeconomic reforms, resulting in infrastructure supply constraints and high administered pricing, 8) negative impact of tariffs on industries like automotive, and 9) reversal of the favorable commodity pricing. The JSE All Share Index declined by 3.0% in the first half of 2026, with a 1-year return of 18.4%. The market was impacted by the weaker resource sector as commodity prices were lower and the consumer sector being impacted by higher fuel prices and rising interest rates. We expect company earnings forecasts to begin declining to reflect higher inflation, increased interest rates and slower economic growth but elevated commodity prices are likely to continue supporting earnings growth in resource-linked sectors. The JSE All Share Index derated in the first half, with the PE declining from 15.3 (December 2025) to 13.6 (June 2026) and is trading at a discount to the 20-year average of 14.4. This derating is despite very strong earnings with the resource sector leading the way. Since 2015, foreign investors have sold R2.9 trillion of South African equities and bonds. In the current environment of heightened geopolitical tension, the South African equity market offers diversification benefits. As domestic conditions improve, including the potential for further ratings upgrades, foreign investor participation is expected to increase, supporting both the equity market and broader economic activity.

The Oasis Crescent Equity Fund (OCEF) is well diversified and delivered a return of 4.3 % in the first half of 2026. The portfolio comprises high-quality companies demonstrating strong leadership, trading at attractive valuations, with robust free cash flow and strong balance sheets, providing relative downside protection. An investment of R1 million at inception on 1 August 1998 would have grown to R55.8 million by the end of June 2026, representing an annual return of 15.5% p.a. compared to its benchmark return of 11.8% p.a., outperforming by 3.7% p.a. at lower risk. This is supported by a higher Sharpe and Sortino ratio, with a downside correlation of 59% over 130 bear months and an upside correlation of 91% over 205 bull months across the Fund’s 335 month history.

Risk and Reward Profile

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

Total Expense Ratio

Class B of the portfolio has a Total Expense Ratio (TER) of 2.11% for the period from 1 April 2023 to 31 March 2026. 2.11% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Transaction cost was 0.02%.

Total Expense Ratio	2.11%	Service Fees	1.00%	Performance Fees	0.24%	Other Costs	0.68%	VAT	0.19%
---------------------	-------	--------------	-------	------------------	-------	-------------	-------	-----	-------

Class B: performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis.

Disclaimer

This document is the Minimum Disclosure Document in terms of BN92 of 2014 of the Collective Investment Schemes Control Act, 2002 and also serves as a fund fact sheet. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future.

Different classes of units apply to some of the Oasis Funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available from the management company on request. Commission and incentives may be paid and if so, would be included in the overall costs. CIS are traded at ruling prices and forward pricing is used. CIS can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. No guarantee is provided with respect to capital or return.

Portfolios are valued at 15h00 daily. All necessary documentation must be received before 10h00. CIS are calculated on a net asset value basis which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio which may include brokerage, commissions, STT, auditor's fees, bank charges, trustee and custodian fees. CIS prices are available daily on www.oasiscrest.com. Class B: performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis. For a full disclosure on performance fees FAQs visit www.oasiscrest.com.

The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Oasis is a member of the Association for Savings and Investment SA. The above portfolio performance is calculated on a NAV to NAV basis and does not take initial fees into account. Income is reinvested on the ex dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Figures quoted are from Micropal and IRESS for the period ending 30 June 2026 for a lump sum investment using NAV-NAV prices with income distributions reinvested.

A fund of funds is a portfolio that invests in portfolios of CIS, which levy their own charges, which could result in a higher fee structure for these portfolios.
