Source: IMF World Economic Outlook

The South African Economy continues to underperform with sluggish growth of 1.1% expected in 2026. The positive effect of the GNU's, Macro Economic reform are gaining momentum and improving the supply side of the economy, especially the electricity, rail and port sectors. The reforms seem to be lagging in local government and the criminal and justice sectors. The agricultural and mining sectors will support growth in 2026. The impact of the Western Asian conflict, with higher fuel and fertilizer prices, has raised inflation, the cost of living and interest rates, offsetting much of the positive impacts of the Macro Economic reform process.

Growth and South Africa's position on the global arena will be further undermined due to the anti-foreigner activities around the country, especially in KZN and Gauteng. Africa is a big trading partner of South Africa and SA corporates have big investments and exports to Africa. If these countries retaliate by slowing SA exports, increased regulation on SA corporates, many South Africans will lose their employment, especially in the highly paid corporate jobs. The South African economy has become dependent on these "foreign" workers and many businesses will be affected by the loss of skills, higher wages, fewer tenants while families reliant on support at home will find it difficult to have both parents working full time. It will take time and cost to replace these skills with South Africans. While macroeconomic reforms will positively affect the supply side of the economy and encourage investment and growth, the geopolitical conflicts, local corruption, failing municipal infrastructure and the continued assault on foreigners will undermine the skills base, the supply side of the economy, investment and economic growth. The South African economy is expected to underperform in the foreseeable future.

The key risks to the South African economy include, 1) geopolitical tension, 2) energy and food supply-chain disruptions, 3) higher inflation and interest rates, 4) the south African political environment becoming more unstable and the continued decline in local government, 5) high levels of corruption, 6) the anti-foreigner movement, 7) the end of macroeconomic reforms, resulting in infrastructure supply constraints and high administered pricing, 8) negative impact of tariffs on industries like automotive, and 9) reversal of the favorable commodity pricing.

	20-Year Average CPI	Current CPI	Difference	Latest OECD 2026 CPI Forecast	Current Central Bank Rate	Decline in Central Bank Rate	Current Real Rate	20 Year Average Real Rate	Difference
USA	2.5	3.5	1.0	4.2	3.75	-1.75	0.25	-0.69	0.94
EU	2.1	2.8	0.7	2.6	2.40	-2.10	-0.40	-0.89	0.49
South Africa	5.5	5.0	-0.5	3.9	7.00	-1.25	2.00	1.18	0.82

Global bond yields troughed during February 2026, followed by significant increases, reflecting expectations of higher inflation following the onset of the West Asian conflict and the disruption of energy- and food-related commodity flows. This is driving changes in the outlook for interest rates, with central banks starting to increase rates. Supply chains will take time to recover, and the second-round impact on inflation, particularly food inflation, will be felt over a prolonged period.

The South African 10-year yield troughed at 8.0% during the first quarter and ended the half year at 8.4% and moved to 8.9% by 23 July 2026, reflecting the shift in the inflation outlook. The OECD inflation outlook for 2026 has increased substantially from the previous forecast, with the US rising from 2.2% to 4.2% and South Africa from 3.6% to 3.9%. This could increase further in an adverse scenario where the war and supply disruptions persist. This will result in the current real rate of 2.00 % in South Africa, placing pressure on the South African Reserve Bank to increase interest rates.

Risk and Reward Profile

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past.
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund.
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested.
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund.
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

Fees and Charges*

Fee Type	Financial Advisor	Administrator	** Investment Manager
Initial	No charge	No charge	No charge
Ongoing	Maximum 0.5% per annum of the investment account.	0.20%	0.70%

* Excluding VAT. ** This fee is calculated and accrued daily based on the daily market value of the investment portfolio and paid to the investment manager on a monthly basis. No performance fee is charged.

Total Expense Ratio

Class F of the portfolio has a Total Expense Ratio (TER) of 0.85% for the period from 1 April 2023 to 31 March 2026. 0.85% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The ratio does not include transaction costs.

Total Expense Ratio	0.85%	Service Fees	0.70%	Performance Fees	-	Other Costs	0.04%	VAT	0.11%

Disclaimer

This document is the Minimum Disclosure Document in terms of BN92 of 2014 of the Collective Investment Schemes Control Act, 2002 and also serves as a fund fact sheet. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future.

Different classes of units apply to some of the Oasis Funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available from the management company on request. Commission and incentives may be paid and if so, would be included in the overall costs. CIS are traded at ruling prices and forward pricing is used. CIS can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. No guarantee is provided with respect to capital or return.

Portfolios are valued at 15h00 daily. All necessary documentation must be received before 10h00. CIS are calculated on a net asset value basis which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio which may include brokerage, commissions, STT, auditor's fees, bank charges, trustee and custodian fees. CIS prices are available daily on www.oasiscrescent.com.

The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Member of the Association for Savings and Investment SA. The above portfolio performance is calculated on a NAV to NAV basis and does not take initial fees into account. Income is reinvested on the ex dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Figures quoted are from Micropal and IRESS for the period ending 30 June 2026 for a lump sum investment using NAV-NAV prices with income distributions reinvested.

A money market portfolio is not a bank deposit account. The price of a participatory interest is targeted at a constant value of 110 cents per unit. The total return to the investor is made up of interest received and any gain or loss made on any particular instrument; and in most cases the return will merely have the effect of increasing or decreasing the daily yield, but that in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio. The yield is calculated according to ASISA standards. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures; in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. All information and opinions provided are of a general nature and the document contains no express or implied recommendation, warranty, guidance, advice or proposal that the product is appropriate to the investment objectives, financial situation or needs of any individual or entity.

Oasis Crescent Management Company Ltd. is a registered and an approved Manager in terms of the Collective Investment Schemes Control Act, 2002, and is the manager of this fund. Investment performance is for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and the income is reinvested on the reinvestment date. The manager has a right to close the portfolio to new investors in order to manage it more efficiently in according with its mandate. This Minimum Disclosure Document is published quarterly. Additional investment information (including brochures, application forms, annual and half-yearly reports) can be obtained free of charge from the Manager. Oasis Asset Management Ltd. is the investment management company of the manager and is authorized under the Financial Advisory and Intermediary Services Act. 2002 (Act No.37 of 2002). Data are sourced from Oasis Research; Morningstar Direct (30 June 2026). Kindly note that this is not the full Terms and Conditions.
