## Investment Manager Commentary

GDP	2022 A	2023 A	2024 E	2025 E	2026 E
	%	%	%	%	%
World Economies	3.6	3.3	3.2	3.3	3.3

The IMF updated its forecast for economic growth in January 2025, with the Global economy expected to grow at a steady state of 3.3 % in both 2025 and 2026, supported by declining interest rates, fiscal stimulus and consumption expenditure underpinned by real wage growth. However, this will all change. The new USA administration ramped up talks of tariffs as soon as they entered power, announcing 25% tariffs on automobile, steel, and aluminium imports, with tariff day announced for 2 April 2025. On this day it announced baseline tariffs of 10% affecting countries like the UK, Saudi Arabia, UAE and reciprocal tariffs on major trading partners including 34% for China, 26% for India, 24% for Japan and 20% for Euro Area, with even higher tariffs on lesser developed countries like 50% on Lesotho, 46% on Vietnam, 40% on Mauritius and 37% on Bangladesh.

China has swiftly responded with 34% reciprocal tariffs on USA imports and have placed controls on important rare earth commodities vital in the production of many goods. Most countries have threatened to respond with their own tariffs on the USA, resulting in a full-blown trade war. If the tariffs are fully implemented, global trade will drop significantly, mergers and acquisition activity will grind to a halt, capital investment outside the USA will fall and inflation will pick up, with lower economic growth, especially amongst the most indebted nations.

Source: IMF World Economic Outlook

With most countries having very high fiscal deficits, rising debt, ageing population, increasing interest costs and defense spending are putting budgets under further pressure, with higher deficits or crowding out other expenditure like social security and healthcare. The New USA Administration has adopted an aggressive cost reduction plan of at least \$1T as it tries to address the fiscal deficit of \$2T or 6% of GDP and \$36T of National Debt. However, it is likely that these "savings" will be given away as tax cuts rather than reducing budget deficits and slowing the debt trajectory.

Outside the USA, most countries will try and support their economies and businesses with fiscal support, putting further pressure on their national debt levels and deficits. In the last major economic and financial market dislocations, the global financial crisis (2008) and Covid-pandemic (2020), economies were supported by massive Fiscal and Monetary stimulus (including lower interest rates and quantitative easing). This time round, with government balance sheets constrained, and tariffs fuelling inflation risk, it is unlikely that Fiscal and Monetary policy will provide a major underpin to the economy and financial markets. The next while requires steady heads and Statesmen to see us through this period of extreme uncertainty.

Global equities retraced most of the gains during the quarter due to the economic uncertainty affecting financial markets with MSCI ACWI Islamic Index having negative returns of -3.7% and -3.0% for the year and quarter ending 31 March 2025. With historically expensive markets, technology and stocks most affected by trade wars, bearing the brunt of the decline. The Nasdaq was amongst the biggest decliners with negative returns of -11.7 % for the March quarter, with cheap, domestically focused, consumer staples and gold equities outperforming. At the end of March 2025 the valuations remain very expensive with PEs on Nasdaq (28.6) and equities like Tesla (118), Nvidia (36.9) and Apple (31.9), with significant downside risk on earnings. Post quarter end this trend has continued with a widespread selloff. As of 4 April 2025, these Indices and equities are down from their recent highs, Nasdaq -22.7%, Tesla -50.1%, Nvidia -36.9% and Apple -27.2%, with further significant downside risk.

The Oasis Crescent Global Equity Fund had a good quarter and year, with returns of 5.8% and 2.2% outperforming by 8.8% and 5.9% respectively. The funds exposure to market leading domestic equities, low-cost gold equities in favorable jurisdictions and low exposure to expensive technology and sectors exposed to global trade have positioned it to navigate these difficult times. Since inception the fund has delivered an annual return of 6.3% p.a. relative to its benchmark of 3.2% p.a. outperforming by 3.1% p.a. at lower risk than the benchmark with a Sharpe ratio of 0.29 versus 0.07 respectively and a downside correlation of 78% over 115 bear months in the funds 292 month history.

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

## Fees and Charges\*

Ongoing	Maximum 1% per annum of the investment account. Where the ongoing financial advisor fee is greater than 0.5% then the initial financial advisor fee is limited to 1.5%.	0%	0%

\* Excluding VAT. No performance fees.

## Total Expense Ratio

Class D of the portfolio has a Total Expense Ratio (TER) of 1.59% for the period from 1 January 2022 to 31 December 2024. 1.59% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The ratio does not include transaction costs.

Total Expense Ratio	1.59%	Service Fees	-	Performance Fees	-	Other Costs	1.59%	VAT	0.00%
---------------------	-------	--------------	---	------------------	---	-------------	-------	-----	-------

Class D: performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis. Note that while the manager is able to charge performance fees, no such fee is charged at this time. Should the manager decide to charge a performance fee at any time in the future, this will be communicated to investors in accordance with prevailing rules and regulations.

## Disclaimer

This document is the Minimum Disclosure Document in terms of BN92 of 2014 of the Collective Investment Schemes Control Act, 2002 and also serves as a fund fact sheet. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future.

Different classes of units apply to some of the Oasis Funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available from the management company on request. Commission and incentives may be paid and if so, would be included in the overall costs. CIS are traded at ruling prices and forward pricing is used. CIS can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. No guarantee is provided with respect to capital or return.

Portfolios are valued at 15h00 daily. All necessary documentation must be received before 10h00. CIS are calculated on a net asset value basis which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio which may include brokerage, commissions, STT, auditor's fees, bank charges, trustee and custodian fees. CIS prices are available daily on [www.oasiscrest.com](http://www.oasiscrest.com).

The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Oasis is a member of the Association for Savings and Investment SA. The above portfolio performance is calculated on a NAV to NAV basis and does not take initial fees into account. Income is reinvested on the ex dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Figures quoted are from Micropal and I Net Bridge for the period ending 31 March 2025 for a lump sum investment using NAV-NAV prices with income distributions reinvested.

A feeder fund, that a feeder fund is a portfolio that invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund.
