Investment Objective and Policy

The Oasis Crescent International Feeder Fund is a Shari'ah compliant rand denominated global general equity fund that invests in the Oasis Crescent Global Equity Fund. Hence, the assets of the portfolio are largely held by the offshore fund, which invests in various global equity instruments that are listed on international stock exchanges. The primary objective of this investment product is to achieve medium to long-term growth in US dollars.

The Oasis Crescent Global Equity Fund is a top-performing Shari'ah compliant global mutual fund that forms part of the Oasis Group's global product range. Oasis Crescent Global Equity Fund is a sub fund of Oasis Crescent Investment Funds (UK) ICVC, managed by Oasis Crescent Wealth (UK) Ltd. Authorised and approved by the Financial Conduct Authority as the Authorised Corporate Director of the fund.

This document constitutes the minimum disclosure document and quarterly general investor's report

The Underlying Global Fund was launched following Oasis Crescent Global Equity Fund's ("OCGEF") merger with the Fund on 11 December 2020.

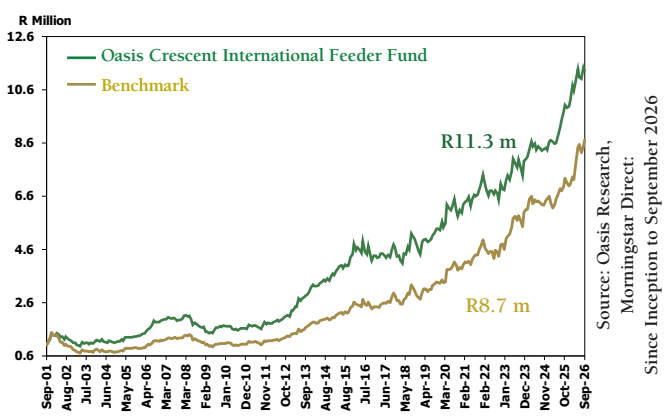

The performance of OCGEF was assessed against the Average Shari'ah Global Equity Peer Group (the "Original Benchmark"). Performance is therefore shown against the Original Benchmark until 11 December 2020 and against the new benchmark, the MSCI ACWI Islamic USD Net Total Return Index, subsequently.

Source: IMF World Economic Outlook

The Global economic growth forecast has moved up slightly despite the negative impact of the West Asian and Ukraine wars, with advanced economies' growth nudging up and emerging economies' growth slowing with West Asian economies moving into recession. Many advanced economies are experiencing severe political unrest e.g. France and massive electoral wins for far-right wing parties e.g. Germany. The fiscal situation is deteriorating, despite high rates of taxation. With the huge fiscal deficits and high levels of debt, many advanced economies are unable to support their social welfare systems which are not designed for a rapidly ageing population. The populists are turning on immigrants, many of whom are educated, skilled and highly productive. Economic growth is at risk due to the impact of the Ukraine and Western Asian wars, high inflation, high interest rates and if investment spend on AI infrastructure slows. The cost of debt capital is likely to remain elevated due to 1) high supply of debt by Governments and Big Tech for their AI build, 2) high inflation and 3) the elevated geopolitical and country risks.

The Global economic risks remain high due to 1) elevated geopolitical tension, 2) energy and food supply chain disruption, 3) higher inflation and interest rates, 4) expanding government debt, 5) ageing populations in many countries, 6) the rise of "Made By China", 7) unstable governments, 8) slower economic growth and 9) unaffordable social welfare systems. Economies that are able to navigate through this period will prosper.

During September 2026 quarter, the global equity markets recovery slowed, as the inflation and interest rates continued to increase, putting pressure on interest rate sensitive sectors and many global stock markets, with a few AI related stocks boosting the market to new highs. The MSCI World Index increased by 2.0% and 12.1% respectively for the quarter and the year to date to September 2026. MSCI ACWI Islamic Index had a blowout 26.2% for the first nine months of 2026, outperforming by 14.1%. This was bolstered by the high exposure to the Semiconductor sector which increased by 49.1% in the period. We expect the massive pickup in investment spend and the resultant increase in depreciation and interest cost will impact company earnings from mid-2027 as these expenses are taken through the income statements, putting pressure on earnings growth relative to sky-high expectations. The MSCI World Index PE ended the period at 21.5, just off its peak of 24.1 which remains above its 20-year average of 17.4. The S&P 500 PE of 23.3 and the Technology heavy Nasdaq's PE of 31.6 are trading at significant premiums to their long-term valuations despite being at elevated earnings growth of 22.2% and 27.4% respectively. The UK FTSE 100, the Euro Stoxx 600 and Hang Seng, with a PE of 13.8, 16.1 and 11.6 respectively remain some of the cheapest equity markets.

Sources: Oasis Research, Bloomberg statistics, IMF World Economic Outlook

The Oasis Crescent Global Equity Fund, (OCGEF), had a return of 14.6 % for the first nine months of 2026 relative to 12.1% and 26.2% respectively for the MSCI World Index and MSCI ACWI Islamic Index, the latter being semiconductor heavy. Since inception, the Fund has delivered an annual return of 7.4% p.a., relative to its benchmark of 4.9% p.a., outperforming by 2.5% p.a., at lower risk. The Fund has higher Sharpe (+0.37) and Sortino (+0.52) ratios, with a downside correlation of 81% over 119 bear months and an upside correlation of 94% over 191 bull months across its 310-month history. Our philosophy is that the most effective way to protect and grow wealth over the long term is to maintain a well-diversified portfolio across asset classes, geographies, sectors and instruments, comprising companies that demonstrate market leadership, strong management, robust balance sheets and sustainable business models. The Fund's exposure to Cash and Gold shares further diversifies the portfolio.

Risk and Reward Profile

The risk and reward indicator:
• The above risk number is based on the rate at which the value of the Fund has moved up and down in the past • The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund • The risk and reward category shown is not guaranteed and may shift over time • The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:
• The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested • Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund • The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

Fees and Charges*

Fee Type	Financial Advisor	Administrator	Investment Manager
Initial	Maximum 3% deducted prior to each investment being made. Where the initial financial advisor fee is greater than 1.5% then the ongoing financial advisor fee is limited to 0.5%.	No charge	No charge
Ongoing	Maximum 1% per annum of the investment account. Where the ongoing financial advisor fee is greater than 0.5% then the initial financial advisor fee is limited to 1.5%.	0%	0%

* Excluding VAT. No performance fees.

Total Expense Ratio

Class D of the portfolio has a Total Expense Ratio (TER) of 1.56% for the period from 1 July 2023 to 30 June 2026. 1.56% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The ratio does not include transaction costs.

Total Expense Ratio	1.56%	Service Fees	-	Performance Fees	-	Other Costs	1.56%	VAT	-

Class D: performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis. Note that while the manager is able to charge performance fees, no such fee is charged at this time. Should the manager decide to charge a performance fee at any time in the future, this will be communicated to investors in accordance with prevailing rules and regulations.

Disclaimer

This document is the Minimum Disclosure Document in terms of BN92 of 2014 of the Collective Investment Schemes Control Act, 2002 and also serves as a fund fact sheet. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future.

Different classes of units apply to some of the Oasis Funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available from the management company on request. Commission and incentives may be paid and if so, would be included in the overall costs. CIS are traded at ruling prices and forward pricing is used. CIS can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. No guarantee is provided with respect to capital or return.

Portfolios are valued at 15h00 daily. All necessary documentation must be received before 10h00. CIS are calculated on a net asset value basis which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio which may include brokerage, commissions, STT, auditor's fees, bank charges, trustee and custodian fees. CIS prices are available daily on www.oasiscrescent.com.

The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Oasis is a member of the Association for Savings and Investment SA. The above portfolio performance is calculated on a NAV to NAV basis and does not take initial fees into account. Income is reinvested on the ex dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Figures quoted are from Micropal and IRESS for the period ending (30 September 2026) for a lump sum investment using NAV-NAV prices with income distributions reinvested.

A feeder fund, that a feeder fund is a portfolio that invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund. All information and opinions provided are of a general nature and the document contains no express or implied recommendation, warranty, guidance, advice or proposal that the product is appropriate to the investment objectives, financial situation or needs of any individual or entity.

Oasis Crescent Management Company Ltd. is registered and approved in terms of the Collective Investment Schemes Control Act, 2002. Investment performance is for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and the income is reinvested on the reinvestment date. The manager has a right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate. This Minimum Disclosure Document is published quarterly. Additional investment information (including brochures, application forms, annual and half-yearly reports) can be obtained free of charge from Oasis. Oasis Crescent Capital (Pty) Ltd. is the investment management company of the manager and is authorized under the Financial Advisory and Intermediary Services Act. 2002 (Act No.37 of 2002). Data are sourced from Oasis Research; Morningstar Direct (30 September 2026). Kindly note that this is not the full Terms and Conditions.
