Risk Profile	Low to Medium	Fund Size	R 1.28 billion
Benchmark	CPI Rate + 1%	Total Expense Ratio	2.00%
Fund Classification	South African Multi Asset-Medium Equity	Class	F
Distribution Period	Quarterly	Distribution	3.0516 cents per unit

Investment Objective and Policy

The Oasis Crescent Balanced Progressive Fund of Funds invests in other funds that have holdings in many possible asset classes. This allows for significant diversification within the ethical parameters of Shari'ah governed investments. The underlying asset classes comprise of listed equities, property, long and short term Shari'ah income products and money market instruments. The Oasis Crescent Balanced Progressive Fund of Funds may be held by a retirement fund as it is managed in accordance with Regulation 28 of the Pension Funds Act 24 of 1956.

The Oasis Crescent Balanced Progressive Fund of Funds is a specialist Shari'ah compliant fund. It has a widely diversified portfolio that is consistent with most retirement funds that impose restrictions on the maximum holding of each asset class. The exposure to equity instruments is relatively moderate and is consistent with the medium equity fund classification. The portfolio will seek to derive medium to long-term capital appreciation (from the rising value of assets) and a relatively small stream of income (from rentals and sukuk instruments).

This document constitutes the minimum disclosure document and quarterly general investor's report

South Africa	1.9	0.7	0.6	1.0	1.3	1.2

Source: IMF World Economic Outlook

The South African economy grew by a disappointing 0.6% in 2024, below the population growth of 1.3%, the low growth trend that started in 2014, resulting in a significant decline in the per capita income over this period. This economic underperformance has been driven by policies focused on consumption and not on investment and growth, despite massive budget deficits of 5.0% and debt to GDP of 76 % for the last fiscal year. With debt service cost making up 22 cents in every Rand of revenue collected by the fiscus highlighting the magnitude of the problem.

The lack of investment first showed up in the electricity sector before spreading to core logistics including rail and ports, water infrastructure and the collapse in municipal infrastructure. Operation Vulindlela which started the reforms and leadership to create the environment to enhance investment has entered its second phase, prioritizing local government amongst others. The GNU has played an important part in reinforcing the reform and delivery process, however the fact that the unity has not entered the provincial and local government, and its fragility has been further exposed in the recent budget fallout and the ongoing ideological clashes between the major parties. A breakup of the GNU will be viewed very negatively, impacting confidence, investment, reform, service delivery and economic growth. The trade war has reached South African shores with a 30% tariff, to be implemented on 1 August 2025, with few exemptions for commodities on SA exports to the US and the secondary effects of the tariff impacts on our largest trading partners. We anticipate that the economic impact on South Africa could be significant.

- Fixed capital investment has declined by 22% in nominal terms since 2013
- Fixed capital investment has declined by 55% in real terms since peak in 2013

South African Equities performed well over the 6 and 12 months with the Alsi returning 16.7% and 25.2%, respectively, based on improved sentiment driving the Alsi PE to 15.9, up significantly from the lows of 9.6, supported by earnings growth of 8.6%. The markets were boosted by gold, platinum, dual listed companies like Richemont, Prosus, Reinet and some of the Insurance shares. SA Inc shares underperformed as the local economy continues to disappoint and the concerns that the GNU could unravel. The tariff wars and the GNU breakup are major risks to SA markets. The Oasis portfolios performed well over the last 12 months, being well diversified. The portfolios are made up of high-quality stocks, with good leadership, trading at significant discounts on the market, with robust free cash flow and strong balance sheets providing relative downside protection. The portfolio is well positioned to add long-term value.

SA listed Reits had a good 12-month performance with returns of 24.0%, and 5.3% for the 6 months to June 2025. With little new supply, vacancies have reduced, with industrial, retail and coastal markets improving the most. Reits also benefited from the narrowing of the discount to Net Asset Value. The Cape Town property markets, with very strong demand and supply fundamentals has driven up rentals to rates supporting new development, with vacant land being the key constraint. The Oasis Crescent Property Fund has continued to perform well, benefiting from a portfolio of high-quality Reits, with positive demand and supply fundamentals in secular growth sectors, with superior balance sheets and excellent management. All its properties barring one, are in the Cape Town metropole with strong fundamentals, a shortage of land and the best functioning municipality in the country. The fund is investigating a number of growth opportunities in Cape Town. The share trades at a significant discount to NAV. The Oasis Crescent Global Property Fund is well positioned to add value over the long term, with leading Reits benefiting from secular demand and with relatively low leverage.

SA bonds had a good year. SA 10 year yields started 2025 at 10.33%, ending March at 10.63% and June 2025 at 10%. The ALBI had returns of 18.4% and 6.6% for the year and half year to June 2025. Global central banks have started lowering policy rates, but appear to be hawkish (except the EU) due to rising risk and inflationary expectations, real rates ranging from 0.15% in EU, 2.10% in USA and 3.1% in China compared to 20 year average real rates of -0.90%, -0.75% and 1.44% respectively. If inflationary expectations rise due to the trade war, there is little scope to cut policy rates, except for China, the US and some Emerging markets which has substantial scope to cut rates. SA Inflation started the year at 3.2% and was 2.8% at the end of May 2025 with inflationary expectations reducing. The SARB started easing interest rates, with rates being cut by 1.00%. The SARB has been conservative in its rate cutting due to elevated Global and SA risks. If this risk reduces, there is a substantial scope to cut rates, supported by high real rates of 4.45%. The Oasis Crescent Income Fund profit rate (including reinvestment of monthly income) is 8.6%. The Fund is a well-diversified portfolio, by geography, sector and instrument, focused on quality income investments. The Fund has done well and is well positioned for these volatile conditions.

Risk and Reward Profile

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

Fees and Charges*

Fee Type	Financial Advisor	Administrator	**Investment Manager
Initial	A maximum of 2% can be charged by the advisor	No charge	No charge
Ongoing	Maximum 0.5% per annum of the investment account.	0.20%	1.25%

* Excluding VAT. **This fee is calculated and accrued daily based on the daily market value of the investment portfolio and paid to the investment manager on amonthly basis. No performance fee is charged.

Total Expense Ratio

Class F of the portfolio has a Total Expense Ratio (TER) of 2.00% for the period from 1 April 2022 to 31 March 2025. 2.00% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The ratio does not include transaction costs. Transaction cost was 0.02%.

Total Expense Ratio	2.00%	Service Fees	1.24%	Performance Fees	-	Other Costs	0.51%	VAT	0.25%
---------------------	-------	--------------	-------	------------------	---	-------------	-------	-----	-------

Class F performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis.

Disclaimer

This document is the Minimum Disclosure Document in terms of BN92 of 2014 of the Collective Investment Schemes Control Act, 2002 and also serves as a fund fact sheet. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future.

Different classes of units apply to some of the Oasis Funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available from the management company on request. Commission and incentives may be paid and if so, would be included in the overall costs. CIS are traded at ruling prices and forward pricing is used. CIS can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. No guarantee is provided with respect to capital or return.

Portfolios are valued at 15h00 daily. All necessary documentation must be received before 10h00. CIS are calculated on a net asset value basis which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio which may include brokerage, commissions, STT, auditor's fees, bank charges, trustee and custodian fees. CIS prices are available daily on www.oasiscrest.com. Class D: performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis. For a full disclosure on performance fees FAQs visit www.oasiscrest.com.

The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Oasis is a member of the Association for Savings and Investment SA. The above portfolio performance is calculated on a NAV to NAV basis and does not take initial fees into account. Income is reinvested on the ex dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Figures quoted are from Micropal and I Net Bridge for the period ending 30 June 2025 for a lump sum investment using NAV-NAV prices with income distributions reinvested.

A fund of funds is a portfolio that invests in portfolios of CIS, which levy their own charges, which could result in a higher fee structure for these portfolios. All information and opinions provided are of a general nature and the document contains no express or implied recommendation, warranty, guidance, advice or proposal that the product is appropriate to the investment objectives, financial situation or needs of any individual or entity.

Oasis Crescent Management Company Ltd. is registered and approved in terms of the Collective Investment Schemes Control Act, 2002. Investment performance is for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and the income is reinvested on the reinvestment date. The manager has a right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate. This Minimum Disclosure Document is published quarterly. Additional investment information (including brochures, application forms, annual and half-yearly reports) can be obtained free of charge from Oasis. Oasis Crescent Capital (Pty) Ltd. is the investment management company of the manager and is authorized under the Financial Advisory and Intermediary Services Act, 2002 (Act No.37 of 2002). Data are sourced from Oasis Research; I-Net Bridge (30 June 2025). Kindly note that this is not the full Terms and Conditions.
