Investment Objective and Policy

The Oasis Crescent Income Fund is a Shari'ah compliant fund. The Oasis Crescent Income Fund is a specialist income portfolio. The primary objective is to provide income from the underlying investments. To achieve this objective, the portfolio consists of a combination of South African and global short-term, medium-term and long-term income generating securities permitted by the Collective Investment Schemes Control Act under Notice 90 of 2014.

The portfolio may also include participatory interests or other forms of participation in collective investment scheme portfolios where such collective investment scheme portfolios are generating periodic income flows. Where the aforementioned portfolios are operated in territories other than South Africa, participatory interests or other forms of participation in these portfolios will be included in the portfolio only where the regulatory environment and investor protection provided is of an international standard and is to the satisfaction of the manager and trustee. The trustee ensures that the investment policy set out in the supplemental deed is carried out.

This document constitutes the minimum disclosure document for this fund.

Total dry bulk exports (Annual) - Mt

The South African economy has continued with its low 1% growth in 2025. However, the green shoots of the structural reforms initiated under Operation Vulindlela is gaining momentum, with electricity sector leading the way with no load shedding, followed by the logistics sector which has started to reverse years of decline, with dry bulk exports at 164mt up 6% YOY and other sectors are starting to deliver. The introduction of competition and the private sector will improve delivery, productivity and address not only volume growth but more affordable prices. The municipal infrastructure and community nonpayment should be key areas in the reform process as they would deliver significant upside. If the reforms continue and are not disrupted by local government elections in 2026 and the leadership changes thereafter, we would anticipate a significant tailwind to economic growth from infrastructure for the first time in 15 years. There are improvements in the fiscal situation, as tax receipts improve, lowering a major risk. The growth momentum is being supported by cyclical forces of strong export prices (gold and platinum), a firm Rand, stable inflation and declining interest rates. Lower agricultural and oil prices could keep inflation lower for longer. The tariff risk could see further collaboration between government and the private sector to find new markets and grow the economy. We are cautiously optimistic about the SA economic growth outlook.

SA bonds had a good year. SA 10 year yields started 2025 at 10.33%, ending September 2025 at 9.2%. The ALBI had returns of 14.0% and 14.5% respectively for the 9 and 12 months to September 2025. Global central banks have been lowering policy rates with some like the EU close to a bottom. Real rates vary with -2.2% in Japan, -0.05 in the EU, 1.35% in the USA, 3.4% in China and 3.7% in South Africa. Inflationary expectations are rising in the USA and Europe and declining in Emerging Markets. SA inflation is currently at 3.3% up marginally this year and should remain subdued due to lower agricultural commodity and oil prices and spare capacity in the local economy. The SARB has cut interest rates by 125 bps and it is expected to cut by another 50 bps by the end of the cycle as confidence grows in the supply side of the economy. The Fund is well-diversified by geography, sector and instrument, focused on quality income investments. The Fund has done well and is well positioned for these volatile conditions.

Risk and Reward Profile

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

Disclaimer

This document is the Minimum Disclosure Document in terms of BN92 of 2014 of the Collective Investment Schemes Control Act, 2002 and also serves as a fund fact sheet. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future.

Different classes of units apply to some of the Oasis Funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available from the management company on request. Commission and incentives may be paid and if so, would be included in the overall costs. CIS are traded at ruling prices and forward pricing is used. CIS can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. No guarantee is provided with respect to capital or return.

Portfolios are valued at 15h00 daily. All necessary documentation must be received before 10h00. CIS are calculated on a net asset value basis which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio which may include brokerage, commissions, STT, auditor's fees, bank charges, trustee and custodian fees. CIS prices are available daily on www.oasiscrescent.com.

The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager is a member of the Association for Savings and Investment SA. The above portfolio performance is calculated on a NAV to NAV basis and does not take initial fees into account. Income is reinvested on the ex dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Figures quoted are from Micropal and I Net Bridge for the period ending 30 September 2025 for a lump sum investment using NAV-NAV prices with income distributions reinvested.

All information and opinions provided are of a general nature and the document contains no express or implied recommendation, warranty, guidance, advice or proposal that the product is appropriate to the investment objectives, financial situation or needs of any individual or entity.

Oasis Crescent Management Company Ltd. is a registered and an approved Manager in terms of the Collective Investment Schemes Control Act, 2002, and is the manager of this fund.
