## Investment Manager Commentary

Global economic growth has remained resilient over recent years despite the impact of lower global trade, lower productivity, higher interest rates and the cost of living crises. A driver of this resilience has been the services activity which has outperformed manufacturing. Looking ahead we are expecting the combination of lower inflation and interest rates over the next 24 months and the cost of living crises subsiding to support stronger economic growth. Productivity is also expected to improve but the geo political pressure will continue to constrain global trade. Inflation is peaking globally and as interest rates decline and economic growth improves we expect asset, equity and property values to increase. Factors that could boost global growth are: 1) Start of global interest rate cut cycle; 2) Lower energy prices; 3) Renewed fiscal policy support for infrastructure development and reindustrialisation 4) Cessation of war in the Middle East and Ukraine; and 5) Technology led improvement in productivity. Factors that could constrain global growth are: 1) Escalation of war in the Middle East and Ukraine 2) Renewed cost push inflation (eg. higher global oil prices) 3) Disorderly unwind of Chinese property market; 4) Significant unwinding of housing markets; and 5) Disruption from technology on labour markets, especially AI.

Inflation is peaking globally and as interest rates decline and economic growth improves we expect asset and property values to increase. The lower development activity due to lower liquidity and the availability of bank funding over the recent monetary tightening cycle has also curtailed new property supply which creates an improving environment for existing property owners. Global REITs with strong management teams and superior balance sheets are well positioned to outperform in the current environment. Your fund is well diversified with high exposure to sectors that benefit from the 4th Industrial Revolution and positive secular drivers including Logistics, Datacenters, Storage and Healthcare.

## Risk and Reward Profile

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

OCGPEF may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis. Should the manager decide to charge a performance fee at any time in the future, this will be communicated to investors in accordance with prevailing rules and regulations.
