The South African economy has continued with its low 1.1% growth in 2025. However, the current estimates for 2026 and 2027 of 1.2% and 1.5% respectively may be too low, due to 1) the continued rollout of structural reforms and its benefits of expanding bulk capacity, 2) coinciding with a cyclical recovery, based on a lower inflation, supporting lower interest rates and 3) reinforced by a very favorable commodity price mix, with very strong precious metals (exports) and weaker soft commodities (imports), like oil and grains resulting in a strong Rand exchange rate. These factors plus the improved financial oversight, with South Africa removed from the FATF Grey List has resulted in the first country rating upgrade in a decade. This positive South African macro economic situation is reinforced by a greater focus by global investors to diversify into stronger growth and lower risk emerging markets which could set the scene for the South African economy to reach growth rates of 3-5%, previously experienced in the 2000-2010 period.

The Risks to this Scenario are 1) significant flare up in Geopolitics, 2) negative impact of tariffs on industries like automotive, 3) reversal of the favorable commodity pricing, 4) the end of reforms resulting in further infrastructure supply constraints and high pricing and 5) the South African political environment becoming more unstable and a continued decline at Local Government. 2026, has the potential to be a defining year with good growth, a positive macro-economic environment with stable inflation and lower interest rates, further rating upgrades and a return of international portfolio investors resulting in significant foreign inflows. This will be good for the economy, financial markets and all South Africans.

Precious metals, oils & grains prices are positive for the current account, Rand, Inflation and interest rates.

SA listed Reits had a good performance in 2025, with a 30.6% total rate of return. With little new supply, vacancies have reduced. The industrial, retail and coastal markets are improving the most. Reits also benefitted from the narrowing of the discount to Net Asset Value. SA property will be a primary beneficiary of the investment in bulk and municipal infrastructure and the improving SA macroeconomic fundamentals and lower interest rates. The Cape Town property markets, with very strong demand and supply fundamentals has driven up rentals to rates supporting new development, with vacant land being the key constraint.

Risk and Reward Profile

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Sub-Fund
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

Total Expense Ratio

Class D of the portfolio has a Total Expense Ratio (TER) of 1.24% for the period from 1 October 2022 to 30 September 2025. 1.24% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The ratio does not include transaction costs. Transaction cost was 0.05%

Total Expense Ratio	1.32%	Service Fees	1.01%	Performance Fees	0.10%	Other Costs	0.04%	VAT	0.17%
---------------------	-------	--------------	-------	------------------	-------	-------------	-------	-----	-------

Class D: performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis.
