Investment Objective and Policy

The Oasis Crescent Equity Fund provides investors with the opportunity to invest in Shari'ah compliant equities that are listed on the stock exchange in South Africa. It seeks to provide long-term growth, while providing a level of volatility that is lower than its peers. The portfolio is actively managed and relies on the detailed independent analysis of the Oasis research team that seek to identify a well-diversified selection of undervalued equity instruments that will provide consistent earnings growth in the near future.

The Oasis Crescent Equity Fund adheres to the ethical investment guidelines of the range of the organisations Shari'ah investment products. In most cases, equity instruments provide the highest potential return over the long-term. However, the higher rates of long-term return may be associated with higher volatility.

Investment Manager Commentary

Post the national elections, the ANC has lost its majority and a Government of National Unity has been formed. The checks and balances of a multi-party government, together with the continuation and broadening of the reform process started in the 6th Administration and combined with the peaceful transition, has boosted local and global confidence in South Africa. The economy is also benefitting from declining inflation, stronger exchange rate, electricity availability increasing, operational improvement at Transnet and the increasing chance and magnitude of interest rate cuts. The outlook for the South African economy is improving and there is potential for a meaningful step up in the growth rate following the recent years of stagnation due to the Eskom and Transnet impact. Electricity load shedding peaked in Q2 2023 at an average load shedding stage level of 3.6 which reduced to 1.6 by Q4 2023 and in Q2 2024 South Africa experienced no loadshedding with Eskom exceeding 100 days without load shedding.

| | Average Loadshedding by Stage | % Change (Year on Year) |
|---------|----------------------------------|----------------------------|
| Q1 2023 | 2.9 | 1519 |
| Q2 2023 | 3.6 | 210 |
| Q3 2023 | 3.0 | 89 |
| Q4 2023 | 1.6 | -40 |
| Q1 2024 | 1.5 | -47 |
| Q2 2024 | 0.0 | -100 |

Over the next year we would anticipate industry players and rating agencies to upgrade economic growth and the sovereign rating of South Africa.

SA equities continued to lag global indices in the first half of 2024 but SA focused companies have had a significant boost since the election. SA Equities remain very attractively priced. Once we see certainty on electricity availability and improvement in logistics infrastructure, we expect to see a substantial recovery in domestic South Africa. With inflation peaking globally we also expect to see the positive impact of interest rate cuts over the next 24 months. The combination of these factors will be good for employment and we expect to see more activity, more demand and an increase in company profitability in South Africa. Your portfolio is well positioned with a focus on companies with market leadership, strong competitive advantages, sustainability, outstanding management, delivering high levels of profitability and cash flow and priced below intrinsic value.

Risk and Reward Profile

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past.
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund.
- The risk and reward category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested.
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the feeder fund.
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

Total Expense Ratio

Class A of the portfolio has a Total Expense Ratio (TER) of 2.34% for the period from 1 April 2021 to 31 March 2024. This implies that 2.34% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Transaction cost was 0.03%.

| | | | | | | | | | |
|---------------------|-------|--------------|-------|------------------|-------|-------------|-------|-----|-------|
| Total Expense Ratio | 2.34% | Service Fees | 1.51% | Performance Fees | 0.02% | Other Costs | 0.58% | VAT | 0.23% |
|---------------------|-------|--------------|-------|------------------|-------|-------------|-------|-----|-------|

Class A: performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis.
